## SUMMARY

I am a Computer Science graduate with advanced skills in web development--both front end and back end, and have gained knowledge of computer science, mathematics, and an array of programming languages and experience for creating full stack software and web-based applications with popular frameworks and REST API. I prefer clean, expressive and easily debugged code and I always strive to produce high-quality code and learn more to improve projects and gain more knowledge and experience in the Web Development field.

## EDUCATION

**College of Science-Salahaddin University, Erbil —**  
*Bachelor's at Computer Science & IT*

SEPTEMBER 2018 - JUNE 2022

coursework: OOP , Data Structure, GUI, Advanced Web Programming, Algorithms

## PROJECTS

### Pizza-Delivery Project

SEPTEMBER 2022 - OCTOBER 2022

Responsive Vuejs 3 web application for pizzerias. The graphic designs on the frontend are in HTML/CSS with vue framework, and Google's firebase cloud services were used. Cloud firestore and authentication tools were used for getting/putting data to/from the cloud and registering and logging in the users

You can check it out at <https://github.com/zainab7681051/pizza-delivery>

### Free-Documentaries Project

SEPTEMBER 2022 - SEPTEMBER 2022

A PEVN stack web application (postgresql, expressjs, vuejs, nodejs) with advanced features. In this website a user can watch free, in public domain

## SKILLS

HTML/CSS/JS

Modern

JavaScript(Nodejs/npm)

Vuejs

Vuetify/Bootstrap

Expressjs

Firebase/ Cloud Firestore

PostgreSQL/Sqlite

Sequelize ORM

JSON/JSON Web Token

Validation/Authentication

C++/Python/C#

Git Bash/Command Prompt

Github

## LANGUAGES

Kurdish

English

Arabic

documentary films fetched from YouTube and embedded inside the app.  
with the help of an API user can also download the YouTube video.

In the admin page, I can perform CRUD functionalities as admin but, as an unauthorized user, I can't access the page thanks to jwt and passport-jwt.
